

Bettis™ XTE3000 Technician Kit

This technician kit is a must have for all XTE3000 technicians.

Kit contents:

- XTE3000 Control Pendant
- XTE3000 USB Programming and Firmware Cable
- XTE3000 Standoff Tool
- XTE3000 Terminal Board Tool Assembly

XTE3000 Control Pendant

The control pendant allows the technician to navigate the menu and enter data while with the local control panel is removed.

XTE3000 USB Programming and Firmware Cable

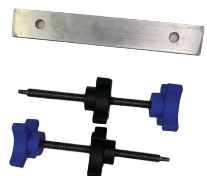

The programming and firmware cable allows direct access to the processor and BUS card ports allowing access via PC to programming parameters and for firmware upgrades. The cable has a USB RS232 modem built in with a chipset that will be recognized by a Windows PC.

XTE3000 Standoff Tool

The standoff tool easily grips both round and hexagonal board spacers and standoffs which makes adding option boards to the XTE easier and safer.

XTE3000 Terminal Board Tool Assembly

XTE3000 terminal board tool have a long spigot, and this tool facilitates extraction of the terminal board without damaging it during service.
