VALVE ACTUATION SPECIALISTS

Rotork is a global leader in valve actuation technology. We provide a comprehensive range of valve actuators, controls and associated equipment, as well as a variety of valve actuator services including commissioning, preventive maintenance and retrofit solutions. We are dedicated to providing the marketplace with the latest technology, consistently high quality, innovative design, excellent reliability and superior performance. Rotork maintains an ongoing research and development programme to ensure that our customers can gain all the benefits that ever advancing technologies have to offer.

Most importantly, we have a long-standing commitment to meeting the special needs of a wide range of applications including: oil and gas exploration and transportation; municipal water and wastewater treatment; power generation; and the chemical and process industries. With over forty years of engineering and manufacturing expertise, we have tens of thousands of successful valve actuator installations throughout the world. We offer a comprehensive range of pneumatic, hydraulic, electro-hydraulic, gas-over-oil and direct gas valve actuators and control systems for rotary and linear valve applications.

RFS AUSTRALIA

As a Rotork Fluid System Centre of Excellence we provide complete valve actuation solutions. Our dedicated team is trained and qualified to serve our customers with custom engineered solutions and complete project management – from contract award; to assembly, test and inspection; to installation and commissioning; and finally to service and preventive maintenance support.

COMPLETE VALVE ACTUATION SOLUTIONS

- End user specification review
- Application engineering
- Actuation control systems design
- Project management
- Document control
- Valve/actuator inspection and test
- Installation and commissioning

SERVICE AND RETRO-FIT

Our sales and service team is qualified to conduct field audits and provide recommendations for the management and service of customer assets. The Rotork Fluid System range of products, together with our engineering capabilities, enables us to provide complete solutions to meet the unique requirements of any customer's application.

- Field service capabilities
- Diverse valve actuator solutions for plant upgrade or retrofit
- Latest control and monitoring product solutions

CONTROL AND MONITORING SOLUTIONS

rotork
fluid system

Complementing our actuation product and servicing capabilities, RFS Australia represents a series of market leaders in control and monitoring equipment for valve actuator, choke valve, wellhead and HPU (hydraulic power unit) control system applications. We proudly represent Bifold Fluidpower, Westlock Controls and Drallim Controls for Australia and New Zealand, providing technical sales support for their products as well as application engineering for system design and integration.

Bifold FluidPower

BIFOLD FLUIDPOWER

Bifold Fluidpower is a world leading designer and manufacturer of directional control valves for hazardous, corrosive, and sub-sea environments. Their product range includes: hydraulic solenoid valves, pneumatic solenoid valves, filter regulators, quick exhaust valves, flow-line pilots, check valves, and a wide range of other flow control accessories. As specialists in both electro-hydraulic and pneumatic products in 316ss construction, Bifold Fluidpower offers a wide range of hazardous area certification options including: EExd, EExme, EExia, AUSEx, ATEX, and IECEx.

WESTLOCK
CONTROLS LIMITED

WESTLOCK CONTROLS

Westlock Controls is a world leader committed to the development of innovative solutions for the monitoring and control of process control valves. Their technologically advanced valve monitoring, control and diagnostic systems satisfy a wide array of process application requirements and meet the latest international standards. Westlock products include: Dual Display Indicators incorporating limit switches for valve position indication, control monitors with integral solenoid valves, monitors containing the latest network communications, and Intelligent Valve Positioners providing exact and accurate valve position.

DRALLIM

DRALLIM INDUSTRIES

Drallim is an industry leader in the field of SVM (Smart Valve Monitoring) solutions and partial stroke testing devices for compliance to IEC 61508 directives. Suitable for pneumatic and hydraulic actuators, Drallim SVM solutions are non-invasive, actuator independent, able to be retrofitted to existing systems and provide testing of all the major control system components to original full closure footprint. SVM systems can include network communication protocols (i.e., Hart, Fieldbus) and comply to hazardous area certifications.
