

Rotork is an established world leader in the supply of electric actuators and believes in the importance of having a dedicated team of Engineers whose role is to concentrate solely on supplying its customers with quick and efficient support for spares requirements.

Our team handle all aspects of the supply of spares from technical support, quotations, order processing and shipping.

We can offer a tailor made recommended spares package to suit new and existing sites of all sizes and for all applications.

We have an extensive database of the actuators supplied over the past 50 years and can offer solutions to any actuators that may require spare parts.

The majority of standard modules for our current range of products are held in stock to enable us to provide a fast turnaround on orders.

We have detailed manuals and CD-ROMs, which give full details on replacing the spare parts we supply.

All of the spares kits we supply include fitting & setting instructions and include our standard warranty.

Our spares team have a number of years experience between them on the various range of products Rotork produce and are always available to contact to discuss any technical questions the customer may have regarding spare parts.
